

Becky Rossof (Director)

Becky has recently retired after teaching biology and chemistry for 30 years at Francis W. Parker School. On many occasions she and her students were in the park collecting data on plant life around the North Pond or surveying trees in the park, looking for signs of the Asian long-horned beetle and more recently the emerald ash borer. Lincoln Park is right outside her door and is now the place for her daily walking and birding.

She was part of the community task force for the rehabilitation of North Pond, serving on the design charrette for that Park District project, and is currently a member of the North Pond Conservation Council. She participated in the 2008 Update to the Lincoln Park Framework Plan.

Becky previously served as president of the Park Tower Condominium Association and is a member of Association of Sheridan Road Condo Owners.

Becky has a B.S. from University of Illinois Champaign-Urbana and a M.S. from Northeastern Illinois
