RE: New Permits

Dear Leslie,

The membership of LPAC has requested that I once again ask that NO NEW PERMITS be issued in Lincoln Park until the revetment project is complete. With so many long-term projects under construction along our lakefront, this leaves very little precious space for those that live along the park to use. By issuing new permits for the small amount of space that remains you in effect kick those that live in Lincoln Park out of their front yard.

We have previously expressed this concern to the CPD in conversation, but since there are rumors that new permits are going to be issued this year we wanted to express our view in writing. No New Permits should be issued until the revetment construction along the lakefront in Lincoln Park is completed.

Respectfully,

Vickie Matthews  
President
